Supporting You Through Your Oncology Journey With Personalized Tools and Resources

Our Oncology programs can help you navigate the challenges and complexities of your cancer treatment. **These programs provide you with tools and resources tailored to your specific needs.**

Oncology Care Management

This program provides you with a full care team of oncology-trained registered nurses, physicians, social workers, dietitians and pharmacists who work together to ensure you're receiving the best possible care. Your Oncology Care Management Team works with you to help provide additional support focused on symptoms and stress associated with a cancer diagnosis. Our goal is improved quality of life for you and your caregivers.

Oncology Navigation

With this program your Navigation team collaborates with your entire care team, including nurse case managers and social workers, to help manage your needs and provide you with a seamless care experience. This program can assist you with finding additional resources to help alleviate stress and concerns. Examples include assistance finding childcare options, food and nutrition concerns or helping with transportation barriers.

Our Oncology Care Management and Oncology Navigation Programs help you improve your quality of life. The goal of our oncology programs is to:

Provide you with the education, support and resources you need.

Reduce unplanned hospital, office, and emergency room visits.

Help you get back to what's important to you.

Identify problems and address your concerns sooner.

Support you as you make difficult decisions.

To enroll in one of our Oncology programs or if you have questions, call us at 1-866-618-4405 or email Oncology.Navigator@BCBSAL.org
